Elac Discovery DS-S101-G in AUDIO test

Andreas Günther, a member of the AUDIO team, tested the ELAC Discovery DS-S101-G in AUDIO 09/2016 and came to the following conclusion:

"A shiny little box that does not really mean anything, it's a form of underachieving because the rivals are building big and heavy, and yet Elac is in the same league: The Discovery Server is a wonderful, fast converter that does more The highlight is the software Roon Essentials, which turns the Elac server into an experience center. "

Plus points:

Bright, transparent, analytical - there is an enormous amount of sound information for the compact design

Negative points:

The Steuerapp Roon requires individualized data - including a private e-mail address

Sound Cinch / XLR: 118 / -
Equipment: good
Operation
: very good

Workmanship: very good KLANGURTEIL: 118 POINTS
PRICE / PERFORMANCE: SUPERIOR
